I. Qualifications and Remuneration

1. On March 25, 2019, I filed an Expert Report (the “McCann Report”) in this matter. My Qualifications and Remuneration are contained in the McCann Report §1 and are unchanged.

A. Materials Reviewed

2. The list of Materials Reviewed in preparing the McCann Report are contained in the McCann Report §2 and are unchanged except to add the following materials:

- a. Administrative Memorandum of Agreement (between DEA and Mallinckrodt);¹
- b. Second Amended Complaint, Cuyahoga County;
- c. Third Amended Complaint, Summit County;
- d. “chargeback” data identified in Appendix 2; and
- e. IQVIA/IMS data identified below.

B. Assignment

3. I documented how I processed, validated and augmented opioid transaction data produced by the Drug Enforcement Administration (“DEA”) and by the Defendants, focused entirely on Distributor transactions in the McCann Report.

4. I have been asked to file this report (the “Second Supplemental McCann Report”) addressing transactions originating with Manufacturer

¹ www.justice.gov/usao-edmi/press-release/file/986026/download

Defendants which ultimately led to opioid transactions with Dispensers in Cuyahoga County and Summit County.

5. I have now been asked by Counsel to document how I further processed and validated opioid transaction data produced by the DEA, to attribute transactions with Dispensers to Manufacturers in this Second Supplemental McCann Report.²

6. I have been asked to summarize transactions in the ARCOS Data, especially those transactions into Cuyahoga County and Summit County attributable to Manufacturer Defendants.

7. I have also been asked to report the results of applying certain algorithms to the ARCOS Data attributable to Manufacturer Defendants.

II. Summary of Opinions

8. I previously concluded that the ARCOS Data produced by the DEA reflecting opioid shipments from January 2006 through December 2014 is reliable. I further concluded that the transaction records produced in discovery by the Distributor Defendants other than AmerisourceBergen are a reliable source of transactions data before 2006 and after 2014 for the varied time periods covered by the Distributor Defendants' transactions productions.

9. In the next section, I explain how the ARCOS Data can be used to identify the Manufacturer for virtually all the transactions in the ARCOS Data. In Section IV and Section V, I report the results of attributing

² On April 3, 2019, I filed a brief supplemental report (the "McCann Supplemental Report") to insert some Figures and Tables which had been inadvertently excluded from the McCann Report.

transactions flagged by a non-exhaustive set of algorithms applied to the ARCOS Data in the McCann Report to Manufacturer Defendants.

III. Attributing Transactions With Dispensers to Manufacturers

A. ARCOS Data

1. NDC Labeler Field

10. Drug packages are uniquely identified in the ARCOS Data by a National Drug Code, or NDC. The NDC has three segments, the first of which identifies the drug product's Labeler which is typically but not always the drug's Manufacturer.³ For example, 00603-3882-28 identifies hydrocodone/acetaminophen tablets manufactured by Par Pharmaceutical.

11. There are 23,280 unique NDCs in the ARCOS Data and 1,991 unique NDCs in transactions with Dispensers in Cuyahoga County and Summit County. There were 1,462,630 opioid transactions to Dispensers in Cuyahoga County from 2006 to 2014 containing 465,121,322 dosage units and 8,553,177,070 MME.⁴ There were 823,049 opioid transactions to Dispensers in Summit County from 2006 to 2014 containing 275,807,920 dosage units and 5,158,182,360 MME.⁵

12. Each record for the 2,285,679 transactions to Dispensers in Cuyahoga County and Summit County from 2006 to 2014 includes an NDC code.⁶

³ "NDC Dictionary Instructions," Drug Enforcement Administration, October 2010. Current version available at <https://www.deadiversion.usdoj.gov/arcos/ndc/readme.txt>.

⁴ See McCann Report, §VIII.A, Table 16.

⁵ See McCann Report, §VIII.B, Table 20.

⁶ From this point forward, my analysis deals with twelve non-treatment opioids.

13. I list the entries in the Labeler field for transactions with Dispensers in Cuyahoga County and Summit County sorted by MME in Appendix 1. The top 20 Labelers by MME - accounting for 96.9% of the total MME shipped to Dispensers - in Cuyahoga County and Summit County are listed in Table 1.

Table 1 Top 20 Labelers, Cuyahoga County and Summit County, ARCOS Data, 2006-2014.

Rank	Labeler Name	MME	Perecent	Cumulative
1	SpecGx LLC	2,363,328,618	24.84%	24.84%
2	Actavis Pharma, Inc.	1,738,415,745	18.27%	43.11%
3	Purdue Pharma LP	1,243,413,759	13.07%	56.18%
4	Mylan Pharmaceuticals, Inc.	812,560,597	8.54%	64.71%
5	Par Pharmaceutical	801,417,396	8.42%	73.14%
6	Sandoz Inc	326,803,360	3.43%	76.57%
7	Teva Pharmaceuticals USA, Inc.	275,018,491	2.89%	79.46%
8	Janssen Pharmaceuticals, Inc.	261,918,787	2.75%	82.21%
9	Endo Pharmaceuticals, Inc.	256,614,381	2.70%	84.91%
10	Hospira, Inc.	218,988,687	2.30%	87.21%
11	West-Ward Pharmaceuticals Corp.	209,187,024	2.20%	89.41%
12	Rhodes Pharmaceuticals	135,748,211	1.43%	90.84%
13	Amneal Pharmaceuticals LLC	126,395,133	1.33%	92.17%
14	KVK-Tech, Inc.	114,646,567	1.20%	93.37%
15	Ethex Corporation	109,507,886	1.15%	94.52%
16	Baxter Healthcare Corporation	65,057,223	0.68%	95.21%
17	Apotex Corp.	60,850,950	0.64%	95.85%
18	Alpharma Pharmaceuticals LLC	36,899,587	0.39%	96.23%
19	Sun Pharmaceutical Industries, Inc.	32,290,942	0.34%	96.57%
20	Cephalon, Inc.	32,166,783	0.34%	96.91%

14. A Manufacturer Defendant may manufacture an NDC-coded drug package but a different firm may be the package's Labeler. The ARCOS Data allows us to more fully identify the Manufacturer of all NDC-coded drug packages shipped to a Dispenser in Cuyahoga County and Summit County by tracing the drug package upstream to the Manufacturer associated with that NDC as I explain next.

2. *Seller Business Activity*

15. Each transaction in the ARCOS Data includes a Seller Business Activity field and a Buyer Business Activity field. Possible values in these fields include “Manufacturer”. Manufacturers can have more than one DEA number and can show up in some transactions as the Buyer and in some transactions as the Seller.

16. A Distributor reporting an opioid sale to a Dispenser purchased that drug either from another Distributor or from a Manufacturer.⁷ Both the Distributor selling to the Dispenser and the Distributor or Manufacturer it bought the drug from report a prior transaction in that NDC. This prior transaction will almost always be for a larger quantity than the transaction to an individual Dispenser since Distributors sell to multiple Dispensers.

17. Shipments to Dispensers in the ARCOS Data can be traced upstream to Manufacturers. The flow of an opioid to the Dispenser may pass through more than one Distributor and through more than one Manufacturer but ultimately there will be a Manufacturer that began the downstream flow of opioids ending at the Dispenser. Based on the ARCOS data, more than 96.6% of the MME shipped to Dispensers in Cuyahoga County and Summit County travel down paths that originate upstream with a Manufacturer.⁸

⁷ Only 0.1% of the transactions, containing only 0.2% of the dosage units and MME, are from Manufacturers directly to Dispensers in Cuyahoga County and Summit County so my example starts with a sale from a Distributor to a Dispenser.

⁸ 98.2% of the MME shipped to Dispensers in Cuyahoga County and Summit County travel down paths that originate upstream with an ARCOS Manufacturer or a distributor owned by a Manufacturer Defendant.

B. Chargeback Data

18. I received “chargeback” data produced by some Manufacturer Defendants. The chargeback data identifies drug by NDC, the Dispenser, the quantity sold and the price received. The chargeback data I have received only partially covers sales of these Manufacturer Defendants’ opioids.

19. The chargeback data I received shows patterns of shipments of drugs from Manufacturers all the way through to Dispensers. Assuming the limited chargeback data provided to me is typical in nature and scope of that available to the Manufacturers, the Manufacturer Defendants could have monitored orders from Dispensers, primarily retail and chain pharmacies, if they received chargeback data for all sales of all opioids they shipped to other Manufacturers and to Distributors.

C. IQVIA/IMS Data

20. The IQVIA/IMS Data I received from Counsel includes some patient information and detailed information including name and physical address of the prescribing physician. Assuming the IQVIA/IMS Data provided to me is typical in nature and scope to that which was available to Manufacturers, a Manufacturer Defendant could have known where some or all of its drugs were being prescribed.

D. Combining NDC, ARCOS Business Activity and Chargeback Data to Attribute Transactions with Dispensers to Manufacturers

21. I am able to identify those NDC for which a Manufacturer Defendant was the Labeler, was the Manufacturer or included the NDC code in its chargeback data for 78.1% of the opioid MME shipped to Dispensers in

Cuyahoga County and in Summit County as reflected in the ARCOS Data produced by the DEA for the period 2006-2014 as follows.

22. I first identify those NDCs that have a Manufacturer Defendant or a Manufacturer Defendant subsidiary as the Labeler.⁹ 73.4% of the opioid MME shipped to Dispensers in Cuyahoga County and Summit County involve NDCs for which a Manufacturer Defendant is the Labeler.

23. Next, I trace back through the transactions from Distributors to Dispensers in the ARCOS Data to the first reported transaction which could plausibly have led to the Distributor's sale to a Dispenser. To make matters concrete, consider the series of ARCOS reported transactions listed in Figure 1. NDC #591350401 identifies 100-tablet bottles of generic 80 mg OxyContin manufactured by Purdue and labeled by Watson.

Figure 1 Example ARCOS Transactions Leading to Ohio Pharmacy

TRANSACTION_DATE	REPORTER_DEA_NO	Reporter_family	REPORTER_BUS_ACT	REPORTER_STATE	BUYER_DEA_NO	BUYER_BUS_ACT	BUYER_CITY	BUYER_COUNTY	BUYER_STATE	DRUG_CODE	NDC_NO	TRANSACTION_CODE	DOSAGE_UNIT	MME	dos_str
11/30/2006	RP0257938	Purdue Pharmaceuticals LP	MANUFACTURER	NC	RS0104517	DISTRIBUTOR	BREWSTER	PUTNAM	NY	9143	591350401	S	543,000	58,415,940	80
12/19/2006	RS0104517	Watson Pharma Inc	DISTRIBUTOR	NY	RA0314562	DISTRIBUTOR	LOCKBOURNE	FRANKLIN	OH	9143	591350401	S	28,800	3,098,304	80
1/5/2007	RA0314562	AmerisourceBergen Drug	DISTRIBUTOR	OH	AK2946854	RETAIL PHARMACY	CUYAHOGA FALLS	SUMMIT	OH	9143	591350401	S	200	21,516	80

⁹ <https://www.fda.gov/Drugs/DevelopmentApprovalProcess/UCM070829> According to FDA's website, FDA assigns the Labeler code, and the product and package codes of the NDC are assigned by the Labeler.

- On November 30, 2006, a Purdue manufacturing facility in North Carolina shipped 5,430 bottles containing 543,000 oxycodone 80 mg tablets to a Watson distribution facility in Brewster, NY.¹⁰
- On December 19, 2006, the Watson facility shipped 288 bottles containing 28,800 oxycodone 80 mg tablets to an AmerisourceBergen distribution center in Lockbourne, OH.¹¹
- On January 5, 2007, the AmerisourceBergen distribution center shipped 2 bottles containing 200 oxycodone 80 mg tablets to a pharmacy in Cuyahoga Falls, OH.¹²

24. 89.9% of the MME in transactions to Dispensers in Cuyahoga County and Summit County can be traced back to a Manufacturer that originated at least 95% of the MME in that NDC nationally. That is, independent of the Labeler information in the NDC code, the Manufacturer provenance of less than 10% of the MME in transactions in Cuyahoga County and Summit County is uncertain as a result of tracing the flow of opioids in the ARCOS Data. 61.1% of the MME in transactions to Dispensers in

¹⁰ The same day, Purdue had four shipments to the Watson distribution center in Brewster, NY totaling 2,169,100 tablets of these 100-tablet packages of generic 80 mg OxyContin tablets. There were regular, similar-sized shipments from Purdue's NC manufacturing facility to Watson's Brewster, NY distribution center. In 2006 alone, the shipments of generic 80 mg OxyContin between these facilities totaled 33,546,300 tablets.

¹¹ The same month, Watson had three shipments to the AmerisourceBergen distribution center in Franklin, OH totaling 100,800 tablets of these 100-tablet packages of generic 80 mg OxyContin tablets. In 2006, the shipments of generic 80 mg OxyContin from Watson's Brewster, NY facility to AmerisourceBergen's distribution center totaled 626,400 tablets.

¹² In 2006, AmerisourceBergen shipped 21,200 generic 80 mg OxyContin tablets from its Franklin, OH distribution center to this pharmacy.

Cuyahoga County and Summit County can be traced to a Manufacturer Defendant.

25. There are some instances, as in Figure 1 above, where the Manufacturer and the Labeler are different but both are Manufacturer Defendants. In other cases, either the Manufacturer or the Labeler – but not both – are Manufacturer Defendants.

IV. Manufacturer Attribution of Flagged Transactions

A. Maximum Monthly, Trailing Six-Month Threshold

26. As described in McCann Report, §IX.A 1,271,618 transactions in Cuyahoga County were flagged using the Maximum Monthly, Trailing Six-Month Threshold. The Trailing Six-Month Maximum Threshold methodology flagged 76.0% of transactions accounting for 89.6% of dosage units, 73.5% of MME and 83.2% of drug weight shipped into Cuyahoga County. McCann Report, ¶ 133.

27. Table 2 reports the result of attributing the flagged transactions in Cuyahoga County to Manufacturer Defendants that were either the Labeler, the Manufacturer or had included the NDC in its chargeback data. This analysis could be extended to earlier and later time periods with additional ARCOS data or using Defendant transaction data before 2006 or after 2014.

Table 2 Trailing Six-Month Maximum Threshold Flagged Transactions Attributed to Manufacturer Defendants, Cuyahoga County, 2006-2014

# of Flagged Transactions	Oxycodone	Hydrocodone	Morphine	Hydromorphone	Oxymorphone	Other	Total Flagged Transactions	Percentage of Total Transactions
Actavis	79,194	124,896	13,103	2	49	2,004	219,248	83.2%
Allergan	76,887	124,119	12,387	2	49	1,999	215,443	83.4%
Cephalon	n/a	n/a	n/a	n/a	n/a	1,312	1,312	42.4%
Endo	25,201	310	2,752	n/a	3,810	n/a	32,073	68.6%
Janssen	80	n/a	n/a	n/a	n/a	3,751	3,831	12.9%
Mallinckrodt	94,772	128,652	9,134	5,527	1	4,774	242,860	87.0%
Par	35,170	68,780	2,866	0	18	9,247	116,081	85.3%
Purdue	73,883	n/a	14,466	440	n/a	n/a	88,789	90.2%
Qualitest	36,543	65,202	3,442	86	18	8,814	114,105	88.3%
Teva	86,427	131,186	8,793	2	1,110	24,361	251,879	82.3%

28. As described in McCann Report, §IX.A 811,825 transactions in Summit County were flagged using the Maximum Monthly, Trailing Six-Month Threshold. The Trailing Six-Month Maximum Threshold methodology flags 75.4% of transactions accounting for 88.5% of dosage units, 71.4% of MME and 83.1% of drug weight shipped into Summit County. McCann Report, ¶ 134.

29. Table 3 reports the result of attributing the flagged transactions in Summit County to Manufacturer Defendants that were either the Labeler, the Manufacturer or included the NDC in its chargeback data.

Table 3 Trailing Six-Month Maximum Threshold Flagged Transactions Attributed to Manufacturer Defendants, Summit County, 2006-2014

# of Flagged Transactions	Oxycodone	Hydrocodone	Morphine	Hydromorphone	Oxymorphone	Other	Total Flagged Transactions	Percentage of Total Transactions
Actavis	41,460	75,546	10,564	8	444	2,384	130,406	84.7%
Allergan	40,665	75,304	9,881	6	444	2,520	128,820	84.9%
Cephalon	n/a	n/a	n/a	n/a	n/a	496	496	30.5%
Endo	21,085	209	5,436	n/a	5,884	n/a	32,614	73.7%
Janssen	268	n/a	n/a	n/a	n/a	2,944	3,212	15.0%
Mallinckrodt	65,656	73,852	11,121	9,804	31	3,847	164,311	84.9%
Par	28,132	44,830	5,638	0	177	2,944	81,721	86.1%
Purdue	38,567	n/a	10,973	710	n/a	n/a	50,250	91.3%
Qualitest	29,806	42,280	6,906	307	177	2,524	82,000	88.5%
Teva	46,806	78,583	6,020	7	3,268	8,927	143,611	83.1%

B. Twice Trailing Twelve-Month Average Pharmacy Dosage Units¹³

30. As described in McCann Report, §IX.B 763,723 transactions in Cuyahoga County were flagged using the Twice Trailing Twelve-Month Average Pharmacy Dosage Units Threshold.

31. The Twice Trailing Twelve-Month Average Pharmacy Dosage Units Threshold methodology flags 45.6% of transactions accounting for 54.9% of dosage units, 57.1% of MME and 59.0% of drug weight shipped into Cuyahoga County. McCann Report, ¶ 137.

¹³ In the McCann Report, I reported the result of comparing transactions with Dispensers to two times, and three times, transactions with similar pharmacies nationally. I do not apply those approaches in this supplement, in part, because of the additional complexity of identifying the Manufacturer for every NDC code throughout the Country as opposed to just in Cuyahoga County and Summit County.

32. Table 4 reports the result of attributing the flagged transactions in Cuyahoga County to Manufacturer Defendants that were either the Labeler, the Manufacturer or included the NDC in its chargeback data.

Table 4 Twice Trailing Twelve-Month Average Pharmacy Dosage Units Threshold Flagged Transactions Attributed to Manufacturer Defendants, Cuyahoga County, 2006-2014

# of Flagged Transactions	Oxycodone	Hydrocodone	Morphine	Hydromorphone	Oxymorphone	Other	Total Flagged Transactions	Percentage of Total Transactions
Actavis	39,389	55,010	10,693	0	78	11,654	116,824	44.3%
Allergan	38,087	54,709	10,135	0	78	11,719	114,728	44.4%
Cephalon	n/a	n/a	n/a	n/a	n/a	2,708	2,708	87.5%
Endo	11,094	101	2,325	n/a	6,220	n/a	19,740	42.2%
Janssen	59	n/a	n/a	n/a	n/a	14,058	14,117	47.4%
Mallinckrodt	45,983	59,378	7,330	7,632	1	5,339	125,663	45.0%
Par	17,257	22,404	2,409	0	50	9,607	51,727	38.0%
Purdue	43,700	n/a	11,262	329	n/a	n/a	55,291	56.2%
Qualitest	18,019	20,964	2,747	115	50	7,103	48,998	37.9%
Teva	43,887	57,178	6,933	0	1,457	33,463	142,918	46.7%

33. As described in McCann Report, §IX.B 676,478 transactions in Summit County were flagged using the Twice Trailing Twelve-Month Average Pharmacy Dosage Units Threshold.

34. The Twice Trailing Twelve-Month Average Pharmacy Dosage Units Threshold methodology flags 62.9% of transactions accounting for 72.5% of dosage units, 74.4% of MME and 72.3% of drug weight shipped to Summit County. McCann Report, ¶ 138.

35. Table 5 reports the result of attributing the flagged transactions in Summit County to Manufacturer Defendants that were either the Labeler, the Manufacturer or included the NDC in its chargeback data.

Table 5 Twice Trailing Twelve-Month Average Pharmacy Dosage Units Threshold Flagged Transactions Attributed to Manufacturer Defendants, Summit County, 2006-2014

C. Three Times Trailing Twelve-Month Average Pharmacy Dosage Units

36. As described in McCann Report, §IX.C 434,698 transactions in Cuyahoga County were flagged using the Three Times Trailing Twelve-Month Average Pharmacy Dosage Units Threshold. The Three Times Trailing Twelve-Month Average Pharmacy Dosage Units Threshold methodology flags 26.0% of transactions accounting for 32.3% of dosage units, 33.5% of MME and 34.8% of drug weight shipped into Cuyahoga County. McCann Report, ¶ 141.

37. Table 6 reports the result of attributing the flagged transactions in Cuyahoga County to Manufacturer Defendants that were either the Labeler, the Manufacturer or included the NDC code in its chargeback data.

Table 6 Three Times Trailing Twelve-Month Average Pharmacy Dosage Units Threshold Flagged Transactions Attributed to Manufacturer Defendants, Cuyahoga County, 2006-2014

# of Flagged Transactions	Oxycodone	Hydrocodone	Morphine	Hydromorphone	Oxymorphone	Other	Total Flagged Transactions	Percentage of Total Transactions

D. Maximum 8,000 Dosage Units Monthly

40. As described in McCann Report, §IX.D 713,969 transactions in Cuyahoga County were flagged using the Maximum 8,000 Dosage Units Monthly Threshold. The Maximum 8,000 Dosage Units Monthly Threshold methodology flags 42.6% of transactions accounting for 61.4% of dosage units, 50.2% of MME and 49.9% of drug weight shipped into Cuyahoga County. McCann Report, ¶ 145.

41. Table 8 reports the result of attributing the flagged transactions in Cuyahoga County to Manufacturer Defendants that were either the Labeler, the Manufacturer or had included the NDC in its chargeback data.

Table 8 Maximum 8,000 Dosage Units Monthly Threshold Flagged Transactions
Attributed to Manufacturer Defendants, Cuyahoga County, 2006-2014

# of Flagged Transactions	Oxycodone	Hydrocodone	Morphine	Hydromorphone	Oxymorphone	Other	Total Flagged Transactions	Percentage of Total Transactions

E. Maximum Daily Dosage Units

44. As described in McCann Report, §IX.E 1,225,867 transactions in Cuyahoga County were flagged using the Maximum Daily Dosage Units Threshold. The Maximum Daily Dosage Units Threshold methodology flags 83.3% of transactions accounting for 92.0% of dosage units, 91.1% of MME and 84.8% of drug weight shipped into Cuyahoga County. McCann Report, ¶ 149.

45. Table 10 reports the result of attributing the flagged transactions in Cuyahoga County to Manufacturer Defendants that were either the Labeler, the Manufacturer or had included the NDC in its chargeback data.

Table 10 Maximum Daily Dosage Units Threshold Flagged Transactions Attributed to Manufacturer Defendants, Cuyahoga County, 2006-2014

V. Flagging Transactions Attributable to Manufacturer Defendants

48. In the previous section, I attributed transactions with Dispensers in Cuyahoga County and Summit County to Manufacturer Defendants and categorized transactions attributed to Manufacturer Defendants according to whether they were flagged or not flagged in the McCann Report.

49. An alternative approach applies the five flagging methods in the McCann Report to each Distributor-to-Dispenser transaction attributable to each Manufacturer Defendant.

A. Maximum Monthly, Trailing Six-Month Threshold

50. Under the first approach, I identify transactions that cause the number of dosage units to a Pharmacy in a calendar month attributable to a Manufacturer Defendant to exceed the highest number of dosage units to the same Pharmacy attributable to the same Manufacturer Defendant in any one of the six preceding calendar months. For example, if the number of dosage

units containing hydrocodone attributable to a Manufacturer Defendant to a Pharmacy in February, March, April, May, June, and July were 5,000; 10,000; 7,000; 8,000; 9,000; and 9,500 respectively, a transaction in August would be flagged if it caused the number of dosage units containing hydrocodone to the Pharmacy attributable to the same Manufacturer Defendant to exceed 10,000. Any reported transactions containing hydrocodone on that date and all reported transactions containing hydrocodone attributable to the Manufacturer Defendant to that Pharmacy thereafter are flagged.

51. In this approach, and the others implemented below, I have been asked by Counsel to assume that the Manufacturer Defendant could have developed intelligence on shipments of its drugs to Dispensers in Cuyahoga County and Summit County allowing it to flag suspect transactions. I have also been asked by Counsel to assume that the Manufacturer Defendant did not effectively investigate the flagged transactions and so every subsequent transaction of that drug code is also flagged because the Manufacturer Defendant had an unfulfilled obligation to detect and investigate the first flagged transaction.

52. Figure 2 illustrates total opioid transactions to retail and chain pharmacies in Cuyahoga County from 2006 to 2014 attributable to Manufacturer Defendants. The Trailing Six-Month Maximum Threshold methodology flags 72.2% of transactions accounting for 85.2% of dosage units, 72.1% of MME and 77.0% of drug weight shipped into Cuyahoga County.

Figure 2 Trailing Six-Month Maximum Threshold Flagged Transactions Attributed to Manufacturer Defendants, Cuyahoga County, 2006-2014

53. Figure 3 illustrates total opioid transactions to retail and chain pharmacies in Summit County from 2006 to 2014 attributable to Manufacturer Defendants. The Trailing Six-Month Maximum Threshold methodology flags 74.0% of transactions accounting for 86.1% of dosage units, 71.7% of MME and 78.1% of drug weight shipped into Summit County.

Figure 3 Trailing Six-Month Maximum Threshold Flagged Transactions Attributed to Manufacturer Defendants, Summit County, 2006-2014

54. Table 12 and Table 13 summarize the transactions flagged based on the Trailing Six-Month Maximum Threshold Approach in Cuyahoga and Summit Counties.

Table 12 Trailing Six-Month Maximum Threshold Flagged Transactions Attributed to Manufacturer Defendants, Cuyahoga County, 2006-2014

# of Flagged Transactions	Oxycodone	Hydrocodone	Morphine	Hydromorphone	Oxymorphone	Other	Total Flagged Transactions	Percentage of Total Transactions

D. Maximum 8,000 Dosage Units Monthly

61. I identify transactions that cause the number of dosage units to a Pharmacy in a calendar month attributable to Manufacturer Defendant to exceed 8,000 dosage units. As stated above, I have been asked by Counsel to assume that the Manufacturer did not effectively investigate the flagged transactions and so every subsequent transaction of that drug code is also flagged because the Manufacturer had an unfulfilled obligation to detect and investigate the first flagged transaction.

62. Figure 8 illustrates total opioid transactions into Cuyahoga County from ARCOS Data for 2006 to 2014 I attribute to a Manufacturer Defendant and the transactions flagged under the Maximum 8,000 Dosage Units Monthly Threshold methodology. This methodology flags 31.6% of transactions accounting for 50.0% of dosage units, 33.7% of MME and 31.7% of drug weight shipped into Cuyahoga County.

Figure 8 Maximum 8,000 Dosage Units Monthly Flagged Transactions Attributed to Manufacturer Defendants, Cuyahoga County, 2006-2014

63. Figure 9 illustrates total opioid transactions into Summit County from ARCOS Data for 2006 to 2014 I attribute to a Manufacturer Defendant and the transactions flagged by the Maximum 8,000 Dosage Units Monthly Threshold methodology. This methodology flags 41.4% of transactions accounting for 64.6% of dosage units, 43.0% of MME and 46.5% of drug weight shipped into Summit County.

Figure 9 Maximum 8,000 Dosage Units Monthly Flagged Transactions Attributed to Manufacturer Defendants, Summit County, 2006-2014

E. Maximum Daily Dosage Units

65. I identify transactions that cause the number of dosage units to a Pharmacy in a day attributable to a Manufacturer Defendant to exceed a

number of dosage units that varies by drug type and within some drug types by formulation.¹⁴ I have been asked by Counsel to assume that the Manufacturer did not effectively investigate the flagged transactions and so every subsequent transaction of that drug code is also flagged because the Distributor had an unfulfilled obligation to detect and investigate the first flagged transaction.

66. Figure 10 illustrates total opioid transactions into Cuyahoga County from ARCOS Data for 2006 to 2014 I attribute to a Manufacturer Defendant and the transactions flagged by the Maximum Daily Dosage Units Threshold methodology. This methodology flags 73.4% of transactions accounting for 86.6% of dosage units, 81.7% of MME and 75.9% of drug weight shipped into Cuyahoga County.

Figure 10 Maximum Daily Dosage Units Flagged Transactions Attributed to Manufacturer Defendants, Cuyahoga County, 2006-2014

¹⁴ Maximum Daily Dosage Units used as specified in CAH_MDLPRIORPRO_DEA07_01384160

67. Figure 11 illustrates total opioid transactions into Summit County from ARCOS Data for 2006 to 2014. I attribute to a Manufacturer Defendant and the transactions flagged by the Maximum Daily Dosage Units Threshold methodology. This methodology flags 79.0% of transactions accounting for 90.7% of dosage units, 87.7% of MME and 82.7% of drug weight shipped into Summit County.

Figure 11 Maximum Daily Dosage Units Flagged Transactions Attributed to Manufacturer Defendants, Summit County, 2006-2014

VI. Conclusion

69. In this supplement to McCann Report, I explained how the ARCOS data, NDC numbers and chargeback data can be used to attribute a transaction with a Dispenser in Cuyahoga County and Summit County to a Manufacturer Defendant.

70. I reported the results of applying the non-exhaustive set of algorithms in the McCann Report for flagging transactions to the transactions attributable to Manufacturer Defendants.

71. I continue to review documents and gather information and reserve the right to update my analysis and opinions based upon that further review of documents and based on any new information - including possibly reports of other experts - I may receive.

Craig J. McCann, Ph.D., CFA

Appendix 2 Chargeback Data

1. InSys Therapeutics
 - a. INSYS-MDL-015002410
2. Janssen
 - a. JAN-MS-02963355
 - b. JAN-MS-02963411
 - c. JAN-MS_03108830
 - d. JAN-MS_05433886
 - e. JAN-MS_05433889
3. Mallinckrodt
 - a. MNK-T1_0007965587
 - b. MNK-T1_0007965588
4. Endo Pharmaceuticals
 - a. ENDO_DATA-OPIOID_MDL-00000044 through
ENDO_DATA-OPIOID_MDL-00000084
5. Par Pharmaceuticals
 - a. PAR_OPIOID_MDL_0001596821 through
PAR_OPIOID_MDL_0001596826
6. Qualitest
 - a. PAR_OPIOID_MDL_0002016639 through
PAR_OPIOID_MDL_0002016786

7. Purdue
 - a. PPLP004418578 through PPLP004422150
8. Actavis
 - a. Acquired_Actavis_01996162 through
Acquired_Actavis_01996173
 - b. Acquired_Actavis_02001331
 - c. Acquired_Actavis_02001522
9. Allergan
 - a. ALLERGAN_MDL_03255576_0001 through
ALLERGAN_MDL_03255576_0010
 - b. ALLERGAN_MDL_03303052_001 through
ALLERGAN_MDL_03303052_003
 - c. ALLERGAN_MDL_03303053_001 through
ALLERGAN_MDL_03303053_050
 - d. ALLERGAN_MDL_03729472
 - e. ALLERGAN_MDL_03729468
 - f. ALLERGAN_MDL_03729469
 - g. ALLERGAN_MDL_03732865
10. Teva
 - a. TEVA_MDL_A_02401118
 - b. TEVA_MDL_A_02416193
 - c. TEVA_MDL_A_02419960
